

Neonatal On-Line Education (NOLE) CEU Information

Learner Objectives:

At the conclusion of this program, the learner will be able to:

1. Recognize two environment of care recommendations identified in the research literature.
2. Name three developmental care practice changes that you can implement based on brain and sensory development, positioning, and protecting sleep.
3. List two neonatal care practice changes you can make based on principles of infant-driven caregiving, going green, and supporting parents' experiences.
